# THE DEATH OF GEN. GEORGE WASHINGTON.

A Letter to the President of the United States, from Tobias Lear, Esq. private secretary to G. Washington.

Mount Vernon. Dec. 15, 1799.

Sir,

It is with inexpressible grief, that I have to announce to you the death of the great and good General Washington. He died last evening, between 10 and 11 o'clock, after a short illness of about 24 hours. His disorder was an inflammatory sore throat, which proceeded from a cold, of which he made but little complaint on Friday. On Saturday morning about 3 o'clock, he became ill. Doctor Craick attended him in the morning, and Dr. Dick, of Alexandria, and Dr. Brown, of Port Tobacco, were soon after called in. Every medical assistance was offered, but without the desired effect. His last scene corresponded with the whole tenor of his life. Not a groan or complaint escaped him, in extreme distress. With perfect resignation, and full possession of his reason, he closed his well spent life.

I have the honor to be, &c.

TOBIAS LEAR.

The President of  
the United States.

## ON THE DEATH OF G. WASHINGTON.

Weep, mortals weep, and let a gen'ral groan  
Thro' the United States their loss bemoan;  
Washington's dead! A Hero disappears,  
Worthy Apollo's or Minerva's tears.  
Let each sad muse pay tributary verse;  
And ev'ry widow'd grace attend his herse.  
He's gone! for ever gone!——But yet his name,  
Shall ring thro' endless ages of eternal fame.

## CHARACTER OF GEORGE WASHINGTON.

HE was in his 68th year. The height of his person was about five feet eleven; his chest full; and his limbs, though rather slender, well shaped and muscular. His head was small, in which respect he resembled the make of a great number of his countrymen. His eyes were of a light grey colour; and in proportion to the length of his face, his nose was long. Mr. Stewart, the eminent portrait painter, used to say, there were features in his face totally different from what he had ever observed in that of any other human being; the sockets for the eyes, for instance, were larger than he ever met with before, and the upper part of his nose broader. All his features, he observed, were indicative of the strongest passions; yet, like Socrates, his judgment and great self command have always made him appear a man of a different cast in the eyes of the world. He always spoke with great diffidence, and sometimes hesitated for a word; but it was to find one particularly well adapted to his meaning. His language was manly and expressive. At levee, his discourse with strangers turned principally upon the subject of Amer-

He was much more open and free in his behaviour at levee than in private, and in the company of ladies still more so than when solely with men. Few persons ever found themselves for the first time in the presence of General Washington, without being impressed with a certain degree of veneration and awe; nor did these emotions subside on a closer acquaintance: On the contrary, his person and deportment were such, as rather tended to augment them. The hard service he had seen, the important and laborious offices he had filled, gave a kind of austerity to his countenance, and a reserve to his manners; yet he was the kindest husband, the most humane master, the steadiest friend.

The whole page of history does not present to our view a character upon which we can dwell with such entire and unmixed admiration. The long life of General Washington is not stained by a single blot. He was indeed a man of such rare endowments, and such fortunate temperament, that every action he performed was equally exempted from the charge of vice or weakness.

In the days of my youth, father Dennis replied,  
I remembered that youth would fly fast,  
And abus'd not my health nor my vigour at first,  
That I never might want them at last.

You are old, father Dennis, the young man said,  
And pleasures with youth pass away,  
And yet you regret not the days that are gone;—  
Now tell me the reason, I pray.

In the days of my youth, father Dennis replied,  
 I remembered that youth could not last,  
 I thought of the future, whatever I did,  
 That I never might grieve for the past.

You are old, father Dennis, the young man said,  
 And life must be hast'ning away,  
 You are cheerful, and love to converse upon death,  
 Now tell me the reason, I pray.

A magistrate, for its happiness! His glory was never sullied by those ex- cesses into which the highest qualities are apt to degenerate. With the greatest virtues he was exempt from the corres- ponding vices. He was a man in whom the elements were so mixed, that "Na- ture might have stood up to all the world," and owned him as her work. His fame, bounded by no country, will be confined to no age. The character of General Washington, which his co- temporaries regret and admire, will be transmitted to posterity; and the mem- ory of his virtues, while patriotism and virtue are held sacred among men, will remain undiminished.

The following may particularly serve the Poor, who, at the present high price of coffee, find it difficult to gratify themselves with it.

## ACORN COFFEE.

Dr. Marx, an eminent German physician, has published in the Hanover Magazine, some experiments, in which he has shewn the great virtues of Acorn Coffee, and has confirmed his experiments by accompanying them with a multitude of facts. It therefore gives us pleasure to acquaint our readers, that such a common fruit is capable of being converted to many salutary purposes.

The method of preparing the Acorn Coffee is as follows :

Take the sound and ripe acorns, peel off the shell or hulk, divide the kernels, dry them gradually, and then roast them in a close vessel or roaster, keeping them continually stirring; in doing of which, special care must be taken that they be not burnt or roasted too much, both of which will be hurtful.

Take of these roasted acorns (ground like other coffee) half an ounce every morning and evening, alone, or mixed with a drachm of other coffee, and sweetened with sugar, with or without milk.

The author says that acorns have always been esteemed a wholesome, nourishing, and strengthening nutriment for men, and that by their medical qualities they have been found to cure the slimy obstructions of the viscera, and to remove nervous complaints when other medicines failed; and although acorns, he says, have, by the moderns as well as by the ancients, been looked upon as a great astringent; and generally applied more outwardly, and very sparingly inwardly; yet he is of opinion, that by fire they lose their astringent quality, and thence have no more that effect than coffee.

### ANECDOTES.

The late Duke of Richmond had some hunters in Suffex. A monkey, who was kept in the same stable, was remarkably fond of riding the horses, skipping from one to the other, and teasing the poor animals incessantly. The groom made complaint to the duke, who immediately formed a plan to remedy the evil. "If he is fond of riding," replied his Grace, "we'll endeavour to give him enough of it;" and accordingly provided a complete jockey dress for the monkey. The next time the hounds were out, Jackoo, in his uniform, was strapped to one of the best hunters. The

King James I. made a progress to Chester in 1617, and was attended by great numbers of the Welch, who came out of curiosity to see him. The roads were very dry and dusty, so that the king was almost suffocated. He did not know well how to get civilly rid of them, when one of his attendants, putting his head out of the coach, said "It is his majesty's pleasure that those who are the best gentlemen should ride forwards." Away rode the Welch at full gallop; and one solitary man was left behind. "And so, Sir," says the

 Supports each drudging mortal thro' his part,  
 Gives a delightful prospect to the blind,  
 The friendless thence a constant succour find;

 With this restorative, still sooths his breast;  
 This suffering virtue cheers, this pain beguiles  
 And decks calamity herself in smiles.
